## PROJECTS

### Dice Game Using React.js.

January 2025- February 2025

- Developed an interactive Dice Game using React.js with dynamic state management and real-time user feedback.
- Utilized component-based architecture and conditional rendering to display game logic, scores, and outcomes efficiently.

### Fake Profile Detection Using Machine Learning

May 2024 - June 2024

- Created a machine learning model to detect fake Instagram profiles using machine learning algorithms and web scraping techniques for data collection and analysis for accurate profile verification.
- Designed a web page using streamlit to display real-time data sourced via web scrapper.

### Portfolio Website

January 2025 - March 2025

- Engineered a responsive, high-performance personal portfolio with a mobile-first design, utilizing
- Next.js, React, and TypeScript for a type-safe, component-based architecture, and Tailwind CSS for a modern UI.
- Enhanced user engagement by integrating dynamic animations (tsParticles, AOS) and developed a full-stack contact solution with a Next.js API route for backend processing and email delivery via Nodemailer.

### Real Time Hand Movement Recognition

August 2024 – October 2024

- Spearheaded the development of a full-stack feedback and invoice application, seamlessly integrating a React/Material-UI frontend with a Node.js/Express backend to create a cohesive and user-friendly experience.
- Implemented a secure MongoDB database with Mongoose for efficient data modeling, ensuring reliable storage and retrieval of feedback and invoices.

## SKILLS

**Tools & Technologies:** Machine Learning, Python,

HTML CSS , JavaScript, React.js

**Interpersonal Skills:** Communication,

Adaptability, Patience.

**Languages:** English, Hindi, Telugu
